About the Book

Robert Mann launches fictional novel relating to environmental issues

The story is set in England 30 years into the future; but it is an England vastly changed due to global warming. The polar ice caps have melted, causing vast areas of the coast line to be flooded. To compound the problem, temperatures have plummeted creating incredible hardship for all.

The story plots the fear, struggle and bravery of three close families and the local Vicar in a small town in the New Forest; as their faith and beliefs are tested to the full by the release of the incarcerated demonic Gorgones from ancient Greek times. The friends must save their town and the multitudes; who inadvertently are ready to take an icy step to oblivion.
