About the Book

Science and Theology Converge Seamlessly in Torah

This book presents a comprehensive overview of the current scientific theory of the beginnings of the universe and life. The author shows that scientific ideas far from contradicting the Torah are actually mirrored in its words.

The more one studies modern science the more one realises that the same themes run through Bereshis (Genesis). The order of creation from modern Science can be mirrored very closely to the order of creation in the Torah. As one studies Science to deeper levels and also tries to study Bereshis to deeper levels, both principles begin to converge on each other.
